PROFILE

Systems Engineer with a comprehensive background in full-stack and multi-platform software development, including a robust foundation in core computer science principles, adept at architectural choices, backend logic, and delivering practical technical solutions.

TECHNICAL SKILLS

- **Languages:** Java, Python, C#, C++, JavaScript/TypeScript
- **Frameworks & Frontend:** Next.js, Vue.js, React, Unity
- **Cloud & Databases:** Firebase (NoSQL, Realtime DB, Auth), REST APIs
- **Concepts & Methodologies:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Architecture, UI/UX Design Fundamentals, Agile Development

WORK EXPERIENCE

Supervised Professional Practices | ISISTAN | March 2025 – March 2026

Unity • C# • Vue.js • Firebase

- Designed and implemented a full-stack system architecture (Mobile, Web, and Cloud) for facilitating clinical cognitive evaluation.
- Developed a mobile application in Unity (C# programming language) within this architecture, featuring interactive 3D environments and a background logging system to record user activity.
- Built a web-based app using Vue.js within this architecture, to allow real-time session monitoring, user access management, and configuration of environment variables.
- Integrated Firebase backend services on both apps to handle secure user authentication, synchronize real-time NoSQL data, and pipe session logs seamlessly between the mobile client and the web console.

PROJECTS

Charades — Open-Source Party Game

Unity • C# | Windows & Android

- Developed an open-source and multi-platform adaptation of the popular party game from scratch.
- Implemented hardware-specific integrations with gyroscope sensors and touchscreen inputs.
- Created an in-app custom category creator and content management system.
- Used a prompt-rotation algorithm to manage game state and avoid repetition within sessions.

Decision Tree Classifier Model for Individual's Movie & TV Recommendations

Python • Pandas • Scikit-learn

- Analyzed and filtered IMDB dataset of personal ratings for TV and movies.
- Trained and tested a Decision Tree Classifier Model using the mentioned dataset.
- Created an image of the resulting decision tree using the Graphviz library.

Workplace Manager Chatbot

IBM Watson Assistant

- Developed a chatbot within the IBM Watson environment, taking the role of an office boss.
- The chatbot keeps track of tasks completed within a conversation through chat.
- Dialog is personalized according to emotions detected in answers and context variables.

Translation Project Website

Next.js • Vercel • React

- Deployed responsive website for the “Jackbox en español” localization project to display progress tracking and contributor credits.
- Integrated SEO best practices and mobile-first design principles to optimize performance and search visibility.
- Set up automated CI/CD deployment pipelines through Vercel for quick and seamless site updates.

EDUCATION

Systems Engineering | 2018 – 2026

Universidad Nacional del Centro de la Provincia de Buenos Aires (UNICEN), Tandil, Argentina

- **Graduation:** March 2026
- **Core Coursework:** Software Development & Engineering, Advanced Algorithms & Data Structures, Operating Systems, Relational & Non-Relational Databases, Project Management and Evaluation.

Secondary School Diploma — Economics & Administration | 2012 – 2017

Instituto Martín Rodríguez, Tandil, Argentina

CERTIFICATIONS

- **AI Fluency: Framework & Foundations** — Anthropic | 2026
- **Spring Boot 4, Spring Framework 7: Beginner to Guru** — Udemy | 2026 (*in progress*)
- **Scientific Computing with Python Certification** — freeCodeCamp | 2024

LANGUAGES

- **Spanish:** Native Proficiency
- **English:** Full Professional Proficiency — Certified C2 Proficiency (Cambridge English: Advanced • Grade A • Score 200)
